Total Staffed Beds Available at HCM: 11

*DSHS is aware that there is a problem with the new cases that were added to the total count on September 21, 2020. For Gillespie County, there were 97 cases that were added to the total cases on the online dashboard. These were all old cases and should have been added to the recovered count. Instead, they were added to the Active Cases Count. This is a statewide issue. They are aware of the problem, but have not offered any projected time frame for having it resolved.

Region 8 has reviewed the data in order to report accurate case counts. These cases have been reviewed to make sure that they are classified correctly, they are included in the appropriate county's case counts, and duplicate reports have been removed.

These cases have already received public health follow-up through the DSHS contracted call center. The majority of these cases are no longer considered active, meaning they are no longer thought to be able to spread COVID-19.
