Total Cumulative Tests per DSHS: 4,753

HCM Positive Cases
not yet included in DSHS Count: 0

Total Known Cases: 314

Cases Hospitalized at HCM: 2

Available Staffed ICU Beds at HCM: 2

Total Staffed Beds Available at HCM: 14

*On September 28, DSHS updated its active case and recovered case estimates. Due to the number of older cases being reported by local jurisdictions, DSHS updated the active and recovered case formulas to ensure these older cases are not counted as active. The number of active cases now more closely aligns with the number of new confirmed cases being reported daily to DSHS. To account for the number of older cases reported by local jurisdictions, DSHS added a step to the recovered case formula to assume these older cases have recovered. This estimated number of recoveries now more closely aligns to the timing of when these cases were likely first identified.

The active case estimate is calculated by taking the number of confirmed cases and subtracting fatalities and estimated recoveries. Because both active and recovered cases are estimates, they can vary from what is reported locally. DSHS uses local estimates when available.
